GALLAND/KIRBY TOTAL HIP ARTHROPLASTY LATERAL APPROACH - REVISION POST-SURGICAL REHABILITATION PROTOCOL

DISCHARGE CRITERIA

- **To Rehabilitation Hospital**
  - Independent/minimum assist with bed mobility
  - Ambulation with assistive device for 30 feet
- **To Home**
  - Independent bed mobility and transfers
  - Able to safely negotiate home obstacles such as stairs and carpet
  - Independent ambulation with assistive device for 300 feet
  - Coordinate with Social Work Services to obtain home equipment
    - Wheeled walker, Three-in-one, Reacher

PRECAUTIONS X 6 WEEKS

- No Hip Flexion > 60 degrees
- Wear TED Hose
- Sleep on back
- Pillow under ankle, NOT under knee, keep foot of bed flat
- Pillow between legs while sleeping
- No active Abduction exercises
- No straight leg raise (SLR)
- No ER > 30 degrees
- No Extension > 30 degrees
- No Adduction past midline

POST-OP WEEKS 1 – 6

- Walker or crutches – flat foot weight bearing (FFWB) up to 20# pressure
- Ankle pumping
- Heel slides, AROM, AAROM with above restrictions
- Quad sets, Co-contractions quads/hams
- Short arc quads up to 10#
GOALS

- Protection
- Hip ROM 0-60 degrees

Weeks 6 - 12

- Walker or crutches – partial weight bearing (PWB) up to 50%
- No hip flexion > 90 degrees
- Continue to sleep on back
- Continue pillow between legs while sleeping
- Continue appropriate previous exercises
- Progressive abductor strengthening
  - In standing
  - Sidelying
  - Add light weight in sidelying when able to perform 25 reps
- Hip extension – Standing or prone
- Sitting knee extension (chair or mat) 90-0 degrees
- Weight shifts in parallel bars
- Mini squats 0-45 degrees in parallel bars
- Double leg heel raises

GOAL

- Hip ROM 0-90 degrees

Months 3 - 4

- Walker or crutches
  - Weight bearing as tolerated (WBAT)
  - Progress to cane and D/C when gait is WNL
- Hip flexion > 90 degrees
- Continue appropriate previous exercises
- Progressive abductor strengthening
  - In standing with Theraband, bilaterally
  - Hip weight machine x 4 bilaterally
- Forward and retro walking in parallel bars
- Forward, retro and lateral step downs (small step)
- Wall squats
- Straight leg raise (SLR)
- Leg press (< 90 degrees hip flexion) up to ½ body weight
- Hamstring curl weight machine
- Knee extension weight machine
- Single leg (stork) standing
- Single leg heel raises
- Stationary bicycle
- Stretches – Hamstring, quads, hip flexors, ITB

**GOALS**
- Symmetrical hip ROM
- Normal gait

**Months 4 - 5**
- Continue appropriate previous exercises with increasing resistance as tolerated
- Practice sit-to-stand without using hands
- Stair training
- Proprioception exercises as tolerated (age dependent)
- Treadmill – Walking progression program
- Elliptical trainer
- Pool therapy

**GOALS**
- Walk x 20 minutes
- Stand from sitting without use of hands

**Months 5 - 6**
- Discontinue supervised PT
- Resume all recreational activities as tolerated
- Encourage non-impact activities
- See attached Precautions and Activities
