GALLAND/KIRBY BASEBALL INTERVAL THROWING PROGRAM: PHASE I - LONG TOSS

- All baseball players must begin re-entry with long toss
- All throwing must be painfree
- Emphasize a “crow-hop” throw with follow-through
- Emphasize a high arc on the ball; no hard, ground-level throwing
- Always warm-up first: jog, stretch, light toss (30-60 feet)
- Soreness to expected; rest and use ice or heat between throwing days
- Continue a maintenance strengthening program; perform after throwing

- Once able to complete 75 throws at 180 feet, begin gradual return to position
